## SPECIAL NOTICE.

We have a large number of names  
on our subscription list that are in  
arrears. Everyone of the parties  
are able to pay for the paper and no  
doubt intend to do so, but from  
carelessness and the fact that the  
item was small it has been neglected.  
These little bills aggregate into a  
large sum, and their absence from  
our coffers makes trouble. We must  
collect. Hence delinquents are here  
by notified that if their subscription  
is not paid by the close of the present  
month, June 30th, their names will  
be taken off the list and their ac-  
counts placed with an attorney for  
collection. With \$4 due the office  
from responsible parties for every one  
that it owes, we are cramped for the  
means to carry on the business, and  
we must have money.

## A Male's Courage.

M. Arnold, in his History of  
animals relates the following in-  
cident of ferocious courage in a  
male: "This animal belonged to a  
gentleman in Florence, and became  
so vicious and refractory that his  
master resolved to make way with  
him by exposing him to the wild  
beasts in the menagerie of the Grand  
Duke. For this purpose he was  
placed in the den of the hyenas and  
tigers all of whom he would have  
soon destroyed had he not been  
speedily removed. At last he was  
handed over to the lion, but the  
male instead of exhibiting any  
symptoms of alarm, quietly reposed  
to a corner, keeping his front ex-  
posed to his adversary. Once placed  
in the corner he resolutely kept his  
place, eyeing every movement of  
the lion, which was preparing to  
spring upon him. The lion how-  
ever, perceiving the difficulty of an  
attack, practised all his wiles to  
throw the male off his guard, but  
in vain. At length the latter per-  
ceiving an opportunity, made a  
sudden rush upon the lion, and in  
an instant broke several of his teeth  
by the stroke of his forefeet. The  
king of beasts, as he had been called,  
finding that he had got quite  
enough of the combat, slunk grum-  
bling to his cage, and left the sturdy  
male master of the field."

## An Unhappy Home.

"I wish my wife would get well  
or—something," said a husband who  
had been sorely tried with an invalid  
wife. It seems a heartless speech,  
but who can tell the discomforts of a  
home where the wife is always sick.  
Poor food, crying children! No  
wonder the man grows desperate.  
But if he would get Dr. Pierce's  
Favorite Prescription for the wife,  
he would find that the sunshine  
would return to his home. "Favorite  
Prescription" is a positive cure for  
the most complicated and obstinate  
cases of leucorrhoea, excessive flow-  
ing, painful menstruation, unnatural  
suppressions, prolapsus or falling of  
the womb, weak back, "female weak-  
ness," anteversion, retroversion,  
"bearing down" sensations, chronic  
congestion, inflammation and ulcer-  
ation of the womb, inflammation,  
pain and tenderness in ovaries, ac-  
companied with "internal heat."

## Love and Sleep.

By PAUL PASNOR.  
(From a letter by Miss Arabella Leslie to  
Miss Bessie Chambers.)  
And now, dear Bess, I must tell  
you about the charming call which  
I enjoyed from my fiancé, Mr. Stub-  
ben, last evening. He is so witty  
and does say such delightful things,  
you know! I don't wonder that he is  
such a popular newspaper man. He  
came rather early, and we drifted to  
the sofa as usual, and began talking  
about the usual subjects, when he  
suddenly remarked that he was  
afraid he had actually gone to press  
without thinking of the leading  
article! I asked him what the "lead-  
ing article" was, and he said that in  
love it is always a kiss—an article  
of "unvarying priority" (whatever  
that means). I blushed, of course,  
but said nothing; and presently he  
apologized for talking shop and asked  
if he could print a kiss on my  
lips. I said I supposed I couldn't  
prevent his attending to his own  
professional duties, if he chose to;  
and so—well, he printed maybe an  
addition, I don't know; how many.  
Then what do you suppose the un-  
conscionable wretch asked me! He  
asked me if I thought he had made

an error. I told him I thought he  
had, certainly. "Then," said he,  
"there is nothing for me to do but  
take a proof and see." Then he  
kissed me about six times more! I  
couldn't help laughing, because I do  
know what a "proof" is, and I ought  
to have been smart enough to have  
prevented him.

About three minutes later he asked  
me if I could let him have a  
"revise." Of course, I hadn't the  
slightest idea what a revise was, but  
replied that if there was one in the  
house, I would get for him. He told  
me to sit perfectly still and he would  
help himself. And he did! (It seems  
that a revise is a second proof.)

Mamma came in just then and  
Mr. Stubben made only two jumps  
from the sofa to the piano stool and  
began playing "Abide with Me." I  
thought I should be laughing! Fred  
is just the funniest, nicest, hand-  
somest fellow in the world! After  
mamma went he began to talk shop  
again—about "setting up" and  
"locking up the form" and "holding  
copy" (he said I was just the copy  
of dear mamma) and lots of other  
delightfully funny nonsense that I  
have forgotten. I began to think  
he would never go, but about 12  
o'clock a messenger boy came with  
a note from the managing editor of  
the paper Fred is connected with  
and it seemed to frighten him almost  
to death. He dashed away without  
even his hat, and I heard him  
mutter something about "severe head-  
ache" and "double lead." I thought it  
must be something dreadful had hap-  
pened or would happen to my Fred,  
but papa said this morning it was  
nothing but a railroad accident, in  
which ninety people were killed.

## ARABELLA.

## Vigor and Vitality.

Are quickly given to every part  
of the body by Hood's Sarsaparilla.  
That tired feeling is entirely over-  
come. The blood is purified,  
riched, and vitalized, and carries  
health instead of disease to every  
organ. The stomach is toned and  
strengthened, appetite restored.  
The kidneys and liver are re-  
freshed and invigorated. The brain is  
refreshed and made clear and ready  
for it. Try it.

## Runaway Husbands.

Perhaps one of the saddest effects  
of the late war which yet remains is  
the great number of people who are  
still missing from their former homes  
and their old friends and relatives.  
For instance, I had an uncle who  
came home shortly after Appomattox.  
He arrived about 3 o'clock one after-  
noon at his home in Kentucky, dis-  
mounted and kissed his wife fondly,  
walked about the place for an hour  
with her, scarcely speaking and very  
moody. Then mounting remarked:  
"Mary, I am going off far a little  
little while; be good to yourself and  
the baby until I come back," and he  
has never been seen by a relative  
since. We have indirectly heard of  
him a number of times, but on going  
to the point, where he had been seen  
he had, invariably, just left. We  
traced him to a point in Dakota  
finally, where he had established  
quite a large sheep ranch, but a week  
before his nephew got there he  
had sold at a great sacrifice and left.  
Southerners can relate hundreds of  
such cases from personal knowledge.  
There are secluded regions in the  
Ozark country which are inhabited  
only by those broken hearted men,  
now Hermits, self isolated from  
society and their relatives. Their  
fastnesses seclude many a husband  
of a supposed widow, or father of  
children who have mourned him as  
dead for more than a quarter century.

## A Woman's Discovery.

another wonderful discovery has  
been made and that too by a lady  
in this country. Disease fasten its  
clutches upon her vital organs were  
undrained and death seemed im-  
minent. For three months she  
coughed incessant and could not  
sleep. She bought of us a bottle  
of Dr. King's New Discovery for  
Consumption and was so much re-  
lieved on taking first dose that she  
slept all night and with one bottle  
has been miraculously cured.  
Her name is Mrs. Luther Lotz.

## ALASKA MAMMOTS.

Monster Animal Supposed to be Ex-  
tinct Still Running on Ameri-  
can Soil.

"Alaska is a country of paradoxes."  
That is what Cola F. Fowler late  
of the Alaska Fur Commercial com-  
pany, said in answer to the question  
of a Philadelphia Press reporter  
respecting his last field of operations.  
Mr. Fowler is stopping temporarily  
in Philadelphia with his friends.  
He is en route to his home near Bos-  
ton, which he left twelve years ago  
to enter the employ of the Alaska  
Fur and Commercial company.

"During all that time, up to two  
months ago, when I resigned and  
started for home," said Mr. Fowler.  
"I have had my headquarters at  
Kodiak, which is the most northern  
station occupied by agents of our  
company. We have our headquar-  
ters in San Francisco and trading sta-  
tions all over Secretary Stewart's  
parish. As yet Alaska is almost  
a terra incognita. The country  
immediately surrounding some of  
the principal rivers like the Snake  
and Stikine has been explored and  
a few miles inland from the coast  
line, but the great interior is almost  
unknown. What we have learned  
of it is a surprise and I was the founda-  
tion for my answer to your question.

Alaska is certainly a country of  
paradoxes. People who live here in  
the states look upon it as a land of  
perpetual ice and snow, and yet you  
would be astonished if I tell you  
that I grew last year, in my garden  
at Kodiak, abundance of lettuce,  
carrots, onions, cauliflower, egg-  
plant, peas, turnips, potatoes, beets,  
parsnips, and celery. Within five  
miles of this garden was one of the  
largest glaciers in Alaska, and be-  
tween the fertile coast and the  
interior is reared along the entire  
sea boundary, a continuous moun-  
tain of perpetual ice and snow.

"During your twelve years' resi-  
dence in Alaska what were the most  
wonderful things you ever saw or  
heard there?"

Mr. Fowler smiled at this ques-  
tion, after a moment's hesitation said:  
"Two years ago last summer I  
left Kodiak for a trip to the head-  
waters of the Snake river, where our  
traveling agents had established a  
trading station at an Innuits village.  
The chief of this family of Innuits  
was named To-lee-ti-ma, and to him  
I was well recommended. He re-  
ceived me hospitably and I at once  
began negotiations for the purchase  
of a big lot of fossil ivory which his  
tribe had caught near the village.  
The lot weighed several thousands  
pounds and was composed of the  
principal and inferior tasks of mam-  
moth, the remains of gigantic  
animals found in the beds in the  
interior Alaska watercourses. I sub-  
jected the ivory to a rigid inspection  
and upon two of the largest tasks I  
discovered flesh blood traces and  
the remains of partly decomposed  
flesh.

"I questioned To-lee-ti-ma, and he  
assured me that less than three  
months before a party of his young  
men had encountered a drove of  
monsters about fifty miles above  
where he was then encamped, and  
had succeeded in killing two, an old  
bull and a cow. At my request he  
sent for the leader of the hunting  
party, a young and very intelligent  
Indian, and I questioned him closely  
about his adventure among a race of  
animals that the scientific people  
claim are extinct. He told a very  
straightforward story and have no  
reason to doubt its truth.

"He and his band were searching  
along a dry water-course for ivory  
and found a considerable quantity.  
One of the bucks who was in advance  
rushed in upon the main body one  
morning with the startling intelli-  
gence that a spring of water about a  
mile above where they then were  
he discovered the 'sign' of several  
of the 'big teeth.' They had come  
down to the spring to drink from a  
lofty plateau further inland and had  
evident fed in the vicinity of the  
water for some time.

The chief immediately called  
about him his warrior, and the party  
under the leadership of the scout  
approached the stream.

"They had nearly reached it when  
their ears were suddenly saluted by  
a chorus of loud, shrill, trumpet-like

calls, and an enormous creature came  
crashing through the thicket the  
ground fairly trembling beneath its  
ponderous footsteps. With wild  
cries of terror and dismay the In-  
dians fled, all but the chief and the  
scout who first discovered the trail  
of the monsters. They were armed  
with large calibre muskets and stood  
their ground and opened fire on the  
mammoth. A bullet must have  
penetrated the creature's brain, but  
it staggered forward and fell  
dead, and subsequently on their way  
back to camp they overhauled and  
killed a cow 'big teeth,' which was  
evident the mate of the first one  
killed.

"I asked the hunter to describe  
the monster, and taking a sharp  
stick he drew me a picture of the  
male animal in the soft clay. Ac-  
cording to his description it was at  
least 20 feet in height and 30 feet  
in length. In general shape it was  
not unlike an elephant, but its ears  
were smaller, its eyes bigger, and its  
trunk longer and more slender. Its  
tusks were yellowish-white in color  
and six in number. Four of these  
tusks were placed like those of a  
boar one on each side of each jaw  
they were about four feet long and  
came to a sharp point.

The two tusks he brought away.  
"I measured them and they were  
over fifteen feet in length and weigh-  
ed upward of 250 pounds each. They  
gradually tapered to a sharp  
point and curved inward. The monster's  
body was covered with long coarse  
hair of a reddish tan color.

"By the way our late governor, the  
Hon. Alfred P. Swinford, has pretty  
carefully investigated the matter  
and is certain from a thorough sifting  
of native testimony that large herds  
of these monsters are to be found on  
the high plateaus in interior Alaska  
about the head waters of Snake  
river."

## The Grand Canyon of the Colorado.

This remarkable phenomenon of  
nature extends over two  
hundred miles along the Colorado  
river, varying in width from ten to  
fifteen miles and in depth from 4000  
to 8500 feet, rising in a series of  
terraces, often beautifully colored  
and marked, frequently castellated  
and peaked. The channel is winding  
and sometimes very narrow, where  
somber recesses the sun's rays rarely  
visit. The river is broken by num-  
ous falls of from fifty to two hundred  
feet in descent, and countless rapids,  
whirlpools, swirling eddies and  
miniature meadows, wherein large  
boulders are oftentimes churned  
about like pebbles in a mill-race by  
the fierce current. The country,  
the Grand Canyon is situated in, is  
a very rough and thinly settled, and  
out of the beaten paths of travel and  
that, with the extreme difficulty of  
entering it either from above or by  
the perilous waters below, have con-  
spired to keep one of the greatest  
wonders of the world a veritable  
terra incognita. A careful examina-  
tion has convinced the writer that  
the old theory, as taught in our  
text-books of geology, that the Grand  
Canyon is the result of the erosion  
of water for many millions of years,  
and the attempt of some to approx-  
imate the age of the globe by cal-  
culations based upon the supposed  
time necessary to wear down 7000  
or 8000 feet of stone, is altogether  
untenable and inconsistent with our  
present knowledge of its topography.  
The whole region gives unmistakable  
proof of once being a sea-bottom, by  
the water-worn rocks, deposits of  
salt, fossils, corals, etc., to be found  
everywhere. It now has an altitude  
of 500 to 6000 feet, the result of  
volcanic upheavals, and it is to this  
that we can look for an explanation  
of the Grand Canyon. This gigantic  
uplifting of the earth's crust caused  
huge fissures to occur in the soft  
sand and silt through which the  
torrents of escaping waters tore with  
irresistible fury, gouging out the  
upper part of the existing channel  
in a comparatively short time. This  
accounts for its great width from  
side to side and also explains the  
cleavage of the Ruskin Mountains,  
which rise 2000 feet above the level  
of the canyon's banks, and could  
never have been the work of erosion.  
The basaltic formation in many  
parts of the canyon, the immense

beds of scoria known as malpais  
rock, which everywhere abounds, the  
silicified forests and the great craters  
of extinct volcanoes in northern  
Arizona, all point to a time of vol-  
canic activity, when those twin  
monsters of the primal world—fire  
and water—contended for mastery.  
The first stratum of the canyon, which  
extends down several hundred feet,  
is a sandstone, next comes a shale  
or slate formation and underneath  
lies a bed of limestone, which in  
some places, notably Marble Canyon,  
seem to be much deeper than at  
others. In this limestone silver is  
more or less to be found. Next  
comes a stratum of salt. That near  
the junction of the Little Colorado  
with the parent stream has been  
mined for many years by the Supai,  
Moqui and Ed City Indians. Below  
this rock salt comes the primeval  
granite, hard as adamant and bear-  
ing gold in some places. These can-  
yons have a peculiar interest to the  
ethnologist, they having once been  
the home of pre-historic men. Many  
relics of these Old Dwellers are to  
be seen, and sometimes a rare find  
rewards the patient explorer in the  
shape of unique pottery or curious  
copper implements, handed down by  
an admixture of silica, now a lost art.  
Who were these mysterious people,  
and what was the cause of their  
sudden extinction? Whether an aw-  
ful pestilence swept them into  
oblivion or the armed hordes of some  
fierce tribe tore them from their  
peaceful homes will always be one  
of the dark secrets of that strange  
land. Many of their habitations are  
almost inaccessible, reached on  
some dizzy cliff, necessitating the  
use of ropes to reach them.
